SUN LONG TRAIL RUN @ CVNP -- 7 mi w/ 500+ ft (BR100 week 2 anchor)

+1 mi from last week, but the bigger change is **elevation**. CVNP has real climbs. Re-introduces sustained climbing under fatigue -- BR100 Leg 8's big climb hits at mile 7-8 fresh; here we practice climbing on tired legs. **HR cap is the constraint, not pace**. If HR hits 150 on a climb, walk a step or two. Expect 13:00-13:30/mi at HR <145 (slower than last week due to climbs -- normal). Fueling: 1 Tailwind bottle + 1-2 SiS gels mid-run. ~1:30-1:40 total.
