Wed May 27	4x6-over-under.zwo -- PEAK over-under, ~60 min. Step-up from last week's 3x6.

WED PEAK OVER-UNDER -- 4x6 (FTP 230W) -- ~60 min

Step-up from 3x6 last week. Same intensities, added 4th block = accumulated fatigue. Each 6-min block alternates **1 min @ 105% (241W) / 1 min @ 95% (218W)**, three pairs per block. 5 min easy between. **Goal: complete all 4 blocks.** If block 4 forces a dropped over (232W instead of 241W), that's still a win.

Block	Duration	Detail
Warmup + prime	15 min	Ramp 50% -> 75%, then 60s @ 90%, then easy
Block 1	6 min	3x [1 min @ 241W -> 1 min @ 218W]
Recovery	5 min	Easy spin @ 55%
Block 2	6 min	3x [1 min @ 241W -> 1 min @ 218W]
Recovery	5 min	Easy spin @ 55%
Block 3	6 min	3x [1 min @ 241W -> 1 min @ 218W] (past last week's volume)
Recovery	5 min	Easy spin @ 55%
Block 4	6 min	3x [1 min @ 241W -> 1 min @ 218W] (final -- empty the tank)
Cooldown	8 min	Ramp 65% -> 45%

Protein: 150g/day -- whey scoop daily

DIETARY sodium target: under 2,500 mg/day

(Italian dressing, full Chipotle bowls, marinara = recurring high-sodium)

Exercise sodium is reported SEPARATELY -- gets used in sweat, not BP-relevant.

Sun fueling test -- 90 g/hr non-negotiable:

Target 270g carbs over 3 hrs

6 SiS gels + 5.5 scoops Tailwind

Set watch alarm every 30 min for gel

Sip Tailwind continuously between gels

This is the FBG dress rehearsal. If gut handles this at tempo for 3 hrs, FBG is ready.
