

Week of Jul 13-19 -- BR100 Taper Week 1

Dress rehearsal done (10.1 mi trail). Sunday double dropped form to -11 -- now recover, re-center on running, cut volume, let form rise.
BR100 Leg 8 (12.3 mi) Sat Jul 25.

DAILY SCHEDULE

Day	Session
Mon Jul 13	Recovery -- rest or easy walk + core + TKEs + wrist hold. Shed the Sunday-double fatigue.
Tue Jul 14	Easy run 3-4 mi, HR <140 + rehab. Gentle shakeout.
Wed Jul 15	Easy run 4-5 mi + 4-6 x 20s strides + light Upper Push + rehab.
Thu Jul 16	Easy Z2 ride 45-60 min OR rest + rehab. Aerobic touch, off the feet.
Fri Jul 17	Easy run 3 mi + light Upper Pull + rehab.
Sat Jul 18	LAST moderate run -- 6-8 mi trail, HR <145, full race-day fueling rehearsal.
Sun Jul 19	Rest or very easy short spin/walk. Into race week fresh.

WHY A TAPER NOW

Fitness (CTL) is high at 72 -- the engine is built. But Sunday's 10 mi run + 43 mi ride (~310 TSS) spiked fatigue and dropped **form to -11 (fatigued)**. With the race 12 days out, the work is done -- now we **shed fatigue so form climbs back to +5 to +15 by race day**. That means **less volume, not more**. Runs stay short with a little sharpness; rides are easy and optional; heavy lifting pauses. Resting HR falling back toward 45-46 is the sign it's working.

SAT FINAL TUNE-UP -- 6-8 mi (not a big one)

Distance is already proven twice (11.13, 10.1 mi). Saturday is a **fueling/pacing rehearsal + leg-sharpener**, HR-capped <145 on trail. Run the exact race-morning fuel (Tailwind + SiS timing) so it's automatic on the 25th. **Finish feeling like you could've kept going.**

STRENGTH (DELOADED) + REHAB

Light upper only (keep legs fresh): WED Upper Push ~15 min (push-ups, DB press, curls, lat raise -- 2 easy sets) FRI Upper Pull ~15 min (CS row, reverse flye, hammer curls, dips) HOLD the heavy lower (goblet/RDL) this week -- fresh legs beat strength gains now.	Daily rehab (continues): TKEs 3x15 each leg with band Iso wrist hold left 7-10 lb x 30-45s <i>Elbow week 8 -- end of the 6-8 wk arc; note how it feels.</i>
--	---

NUTRITION -- TAPER

Daily targets: Cal: 2,000-2,300 most days; fuel the Sat run Protein 150g/day -- whey scoop daily Modest deficit OK this week	Race prep note: Sat run = final race-morning fuel rehearsal (Tailwind + SiS) NEXT week (race week): shift to fueling, not deficit Hydration up in the heat
