WEEKEND RIDE TRIP -- Columbus <-> Yellow Springs (~120 mi total)

~60 mi each way, mostly flat, **light gear (<10 lb -- extra kit + casual clothes, NOT loaded bikepacking)**. ~3.5-4 hrs each at Z2 (HR 120-134, 129-172W). Two big aerobic days back-to-back -- the real training value of the week. **Fuel ~50-70 g carbs/hr** (Tailwind + SiS -- lighter than race intensity, but don't run empty day 1 and pay day 2). **Hydrate hard** (July heat, ~2L sweat/day expected). **Fri night:** protein + carbs at the Airbnb -- real meal, sets up Sat + Sun. **Don't hold a deficit Fri/Sat** -- these are 2,600-3,000+ cal days. Fuel and recover; trend resumes next week.

SUN RUN -- on tired legs (run-off-the-bike durability)

After ~120 mi of riding, legs will be depleted and fatigued -- **that's the point**. BR100 Leg 8 is the anchor leg, run on a body that's already worked. **7-9 mi by feel, HR <145**. If legs are genuinely cooked, 5-6 mi easy is a win -- no ego. Pace will be slow; HR cap is the constraint. Light fuel before + Tailwind/gel if it goes past ~70 min.
